

λα MENADE

REVERSUM

- LYRICS -

01. LIFE RESOUNDS

We could forget the dread and violence
We could forgive the abuses suffered
Come what may, life resounds
When will this greed become unbearable?
When will this pain also become yours?
After all, life resounds...resounds
Try to kill this
Try to kill this
Fades every chance for us to be saved
Fail.
All the feelings seem to be erased,
I feel you, I feel you
What if we start being responsible?
What if we learn to respect this world?
Anyway, life resounds
And you can't kill this
Fades every chance for us to be saved
Fail.
All the feelings seem to be erased,
But I feel you, I feel you
I feel you here
I feel you here

02. ALONE

I'm alone here
All that I've seen it is carved on my skin
And my mind is a place where thoughts still kill
See world's bleeding
All that I've seen has no meaning at all
I just gotta delete
Delete it all
Scream your rage
Feel this pain
Every single suffering
You'll be your own salvation

Every single suffering

Tears keep falling

All of those lies, those invisible crimes

No one cares if somebody's dying there outside

Fears get closer

Time's just arrived to face demons and fight

Would you be by my side?

Would you be by my side?

Scream your rage

Feel this pain

Every single suffering

You'll be your own salvation

Every single suffering

Makes you not turn back

Face their violence (Face/their/violence)

Don't turn back

Scream your rage

Feel this pain

Every single suffering

You'll be your own salvation

Every single suffering

Every single suffering

03. BLACK DAYS

Rain is falling down

On my face, blinding me

Drops of hate, deception

Tasting of mud and pain

Eyes can't see

What cannot be seen

Change your point of view on this

Change your point of view on this

Anesthetized reality

Black days we live

The sea is weakening

Breathing its last breath

One by one, the pages

Are turning into blank sheets

Eyes can't see

What cannot be seen

Change your point of view on this

Change your point of view on this

Anesthetized reality

Black days we live

Change your point of view on this, point of view on this

Change your point of view on this

04. OBLIVION

Let me see the light
I forgot that day. My eyes see nothing
Darkness behind me
The moonlight's on my face
My body's divided
Would you take this medicine?
You're gonna need some medicine
Consciousness is everything
Seems you lost it all

Falling lost in Oblivion

We feel scared

If heaven had ever existed

It wouldn't be on this Earth

Turn off that radio
The SOS can wait
Floating through the remains of life
I just wanted to go back home
You could take this medicine
Now you need some medicine
Consciousness is everything
Seems you lost it

Falling lost in Oblivion

We feel scared

If heaven had ever existed

It wouldn't be on this Earth

Stuck in this Oblivion
Searching for asylum
Stuck in this Oblivion
Searching for asylum

Falling lost in Oblivion

We feel scared

If heaven had ever existed

It wouldn't be on this Earth

05. ZERO

Creeping lies of hate and violent crimes
Words can divide and lead communities to fight
If you can tread on dignity
No right is ever safe
So start your countdown
You will be the next one to be blamed
Emptiness is crushing you
Blindness will bury you
Do you feel better now?
Your life ain't worth more than mine
Will you keep hurting us
Until you have enough?
Do you feel better now?

Your life ain't worth more than mine

Will you keep hurting us

Until this hate devours us?

Light has grown so dim, a toxic smoke has cleared

Echoes of sirens screaming sounds of our defeat

You failed your chance to change the world when you could've

You spread violence instead working for your own good

While you were numb point of no return we reached

While you're deaf a million voices fade silently

Do you feel better now?

Your life ain't worth more than mine

Will you keep hurting us

Until you have enough?

Do you feel better now?

Your life ain't worth more than mine

Will you keep hurting us

Until this hate devours us?

Do you feel better now? Ah! Your life ain't worth more than mine

Do you feel better now? Will you (will you?) have enough?

Do you feel better now? Ah! Your life ain't worth more than mine

Do you feel better now? Until this hate devours us

06. BEAUTY HAS GONE

Lost in our greed

We turned this world to disease

And filled our void with our needs

More than we think

What do you see?

What will you be?

No more lies here

We're becoming blind

Feel everything on your skin

Because time kills every wish

Nothing is real

We lost our wings and dreams

Like unemotional seeds

Who will we be?

We all walk alone

We all talk alone

Now we've got no more

Words to say

Feel everything on your skin

Because time kills every wish

Keep what is real

What is left?

Beauty's gone and we feel more alone

Feel everything on your skin

Because time kills every wish

Keep what is real

What is left?

Beauty's gone and we feel more alone

07. RELEASE ME

I feel violated
Caught in the cage you built for me
My crime is not real
Wake me! Wake me!
Would you live this way?
Would you feel the same?
I'm so tired of your false morality and hypocrisy,
You're wicked and a creep, you will never silence me!
Release me! Release me!
You might try to underestimate me
Despite the chains you wrapped me with
This is me
I feel rejected
Oppressed by such brutality
Intolerance kills
Wake me! Wake me!
Try to live this way
Try to feel the same
I can't get used to your speeches and defamatory views
You make the rules
But I won't bow down to you
Release me! Release me!
You might try to underestimate me
Despite the chains you wrapped me with - This is me this is me
Release me! Release me!
You might try to underrate me
Despite these chains I'm tied up in
This is me - This is me
Release me! Release me!
You might try to underestimate me
Despite the chains you wrapped me with
This is me this is me
Release me! Release me!
You keep trying to suffocate me
I'll break these chains around me
Release me!

08. CLOSER

We feel we're hanging here
Upside down
Nothing seems real
We stargaze
We do not belong here
We do not belong here
Why should we be pleased?

Closer
Nearer
Answers that we hope not to find
Sinking
Deeper
Prisoners and blinded, we all feed this hypocrisy
Changing point of view
Open minded
Seeking out a way
To escape
We can overcome this
We can overcome this
If we let these eyes see
Closer
Nearer
Answers that we hope not to find
Sinking
Deeper
Prisoners and blinded, we all feed this hypocrisy
Closer
Nearer
Still so blind

09. REVERSUM

A ghost is on my back
I know I have to sacrifice myself
Or your love
Scream if you can scream,
Run away
Feel if you still feel
Before it's too late
